PROFESSIONAL SUMMARY

Distinction-level MSc Data Analytics graduate with strong hands-on experience in data analysis, predictive modelling, machine learning, and business intelligence. Proficient in Python, R, SQL, Excel, and Power BI with applied experience in healthcare analytics, energy demand forecasting, and large-scale statistical datasets. Skilled in transforming complex data into actionable insights to support data-driven decision making.

CORE TECHNICAL SKILLS

Programming: Python, R, SQL

Data Analysis: Excel (Advanced), Power BI, Tableau, SPSS, Statistical Analysis

Machine Learning: Regression, Classification, XGBoost, LSTM, Decision Trees, AI

Statistics: Predictive Modelling, Time Series Analysis, Forecasting

Cloud/Data Engineering: AWS Glue, Athena, ETL Pipelines

Tools: GitHub, Jupyter, RStudio, Shiny Dashboards

EDUCATION

PhD (Current) — Leeds Beckett University, UK

MSc Data Analytics & Technologies – University of Greater Manchester, UK

Grade: Distinction

Key Areas: Machine Learning, Time Series Analysis, Data Mining, Cloud Data Engineering

BSc Statistics – Alex Ekwueme Federal University, Nigeria

Upper Division Honours

PROFESSIONAL EXPERIENCE

Administrative Assistant (Data Analysis Focus) – Eko Electricity Distribution Company, Nigeria (2024–2025)

- Analyzed electricity consumption data using R, improving demand forecasting accuracy.
- Automated recurring analytics reports reducing manual workload by ~30%.
- Delivered insights supporting operational and distribution planning.

EMID Data Recorder – National Primary Health Care Development Agency, Nigeria (2022–2023)

- Managed immunisation datasets ensuring high data quality and validation.
- Supported public health decision-making through accurate reporting.
- Conducted data cleaning and discrepancy resolution.

Data Analyst – National Bureau of Statistics, Nigeria (2021–2022)

- Analysed survey datasets using R, Excel, and Power BI.
- Produced statistical reports for policymakers.
- Supported national data collection and quality assurance processes.

KEY DATA PROJECTS

House Price Prediction Machine Learning Project

- Developed ML models (XGBoost, LSTM, SVR, Decision Tree) for price prediction.
- Achieved ~15% RMSE improvement via hyperparameter tuning.
- Built interactive Shiny dashboard for predictions.

Healthcare AI Triage MSc Project

- Developing AI-assisted system for medical imaging scan selection.
- Focus on ethical AI, healthcare analytics, and decision support.

Used Car Market Web Scraping Analytics

- Scraped 5,000+ UK car listings using Python (BeautifulSoup, pandas).
- Performed analysis in R identifying pricing and depreciation trends.

AWS Data Engineering Academic Project

- Built ETL workflows using AWS Glue and queried datasets with Athena.
- Demonstrated cloud data pipeline and warehouse querying skills.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Aspire Institute Leadership Program

Business Analytics with Excel – Johns Hopkins University

Introduction to Statistics – Stanford Online

AWS_Academy_Graduate__Cloud_Foundations

AWS_Academy_Graduate__Data_Engineering

Jobberman Soft Skills Training

ADDITIONAL INFORMATION

Work Preference: Remote, Hybrid, Onsite (UK, Europe, International)

Portfolio projects available on GitHub and personal website.
